

INSTRUCTIONS: Cut out ELEVATION, FLOOR PLATE and ROOF PLATE(s) along their outer edges. Trace the top edge of the FLOOR PLATE with a thin line of glue along edges 1-10. Fold the ELEVATION along folding lines indicated and then carefully place on top of the floor plate, taking care to align the edges. Once the the ELEVATION and FLOOR PLATE have stuck, trace the top edges of the ELEVATION with a thin line of glue and carefully place the 2 ROOF PLATES on top, keeping a 2 mm cantilever on all sides for the roof.
